

Education

How much for school expansion. Will someone pay?

We have an excellent school which needs a mixed and healthy village to provide 121 pupils for years to come

It would be a shame if the school was forced to increase its capacity – it is a lovely village school with very high standards

School must not be forced to enlarge its capacity or lower its standards of provision as a result of an obligation to serve increased population.

Why would expansion mean lower standards?

School would need funding and careful expansion without compromising standards. Benefit to community would be pre-school building next to school

School will need expansion. Most local schools are full. Not bus to Cranbrook

School is at capacity - any increase in housing will put additional strain on the school

Worry over school expansion

Car park for primary school (parking and turning area)

If we don't allow development there will be no need for a school

Build pre-school and enlarge school

If additional housing goes ahead then the school will need to expand – maybe with additional facilities for community activities

Pre-School

We need a pre-school building next to the school

Pre-school could do with own premises

Build pre-school and enlarge school

A pre-school building designed for the purpose essential

Benefit to community would be pre-school building next to school
