

Health and Social Care

Wonderful surgery and we are so lucky

Surgery and facilities are great

We are so lucky with our wonderful doctors and surgery

Wonderful surgery and healthcare look after it

We are very fortunate with our surgery doctors and nurses

First class doctors, dispensing and nurse facilities - ensure it is not lost

Our facilities are excellent at present – let's keep it that way

The surgery is excellent

V lucky with doctors

Our GP practices are excellent. It would be difficult to maintain the present high standards if the population increases a great deal

Our Health Centre is perfect. Will it cope with lots more houses

Our surgery is fantastic. We are very lucky. However more people moving into the village will impact on that.

More funding for GP services

Local facilities mustn't be compromised and no reason why they should be if it planning is carefully considered

Support – The Health and Wellbeing Centre

We are very fortunate with both formal and informal(Community Neighbour) provision

Very good provision from our GP practice. Proactive re health and wellbeing i.e. prevention better than cure, flu vaccination , Diabetes etc

Good H/C and staff in both surgeries. Great to hear about health and wellbeing.

Doctor's salaries should be invested in the business. More equitable wages

Remember there are two surgeries in the village

A village nursing home and residential

How about a nursing home here?

Em47. Sadly we have no “residential care” or “warden controlled” facilities to enable residents to remain in the Village. Should any opportunities arise for either of these, can we please take them
