

Miscellaneous

The strategy talks about Mid Devon being primarily a rural district and that the economy should be sustainable. There is no point in creating a lot of new housing and business premises if there is no demand.

Let's not just be commute village.

Please consider safety as a priority. The village is full of small children.

Scouts' hut for other uses.

I am very proud of our village and all it has to offer but it is easy to become complacent and we must look to the future, working together to keep our village special.

Any development whether for housing or industry should take note of lessons being learnt elsewhere in an area of climate change. Flooding has become a serious issue and an increased acreage under concrete and tarmac does not allow for natural drainage under the soil.

If this village gets any bigger, it will cease to become one and will be a commuter belt village where no-one cares.
