

Bringing Ultrafast Broadband TO YOUR AREA

Connecting Devon
and Somerset

airband
high speed internet

AIRBAND JUNE NEWSLETTER

You may be aware that in June 2017, CDS (Connecting Devon and Somerset), with support from the Government, signed contracts with Airband to deliver wireless or full fibre broadband to 17,974 homes and businesses in earmarked areas of Devon and require the construction of an estimated 745 miles of fibre network. The delivery phase began in 2019 and is due to be completed in 2022.

Time is fast approaching for Airband to be reaching your area. This is a courtesy email to let you know that surveying and design is now complete, and the network build will start in your parish over the next few weeks. Using the current infrastructure, where possible, we will ensure we look at the quickest way to get your premises connected to Airband's Fibre to the Premises (FTTP).

Please register your interest and to find out whether you will be able to get our fibre broadband to your household by visiting
www.airband.co.uk

As the Community Liaison Executive for your region, my role is to purely liaise with the Parish Council and parishioners alike, to ensure we provide a continual communication flow from start to finish of the fibre broadband project within your area. You also have a direct point of contact should you have any questions or issues arise throughout this period and beyond.

If you would like any further information, please do not hesitate to contact me.

Kind regards,

Paul Nethercott
